Removal Instructions

Ferrari 430 Round Side Vent Removal

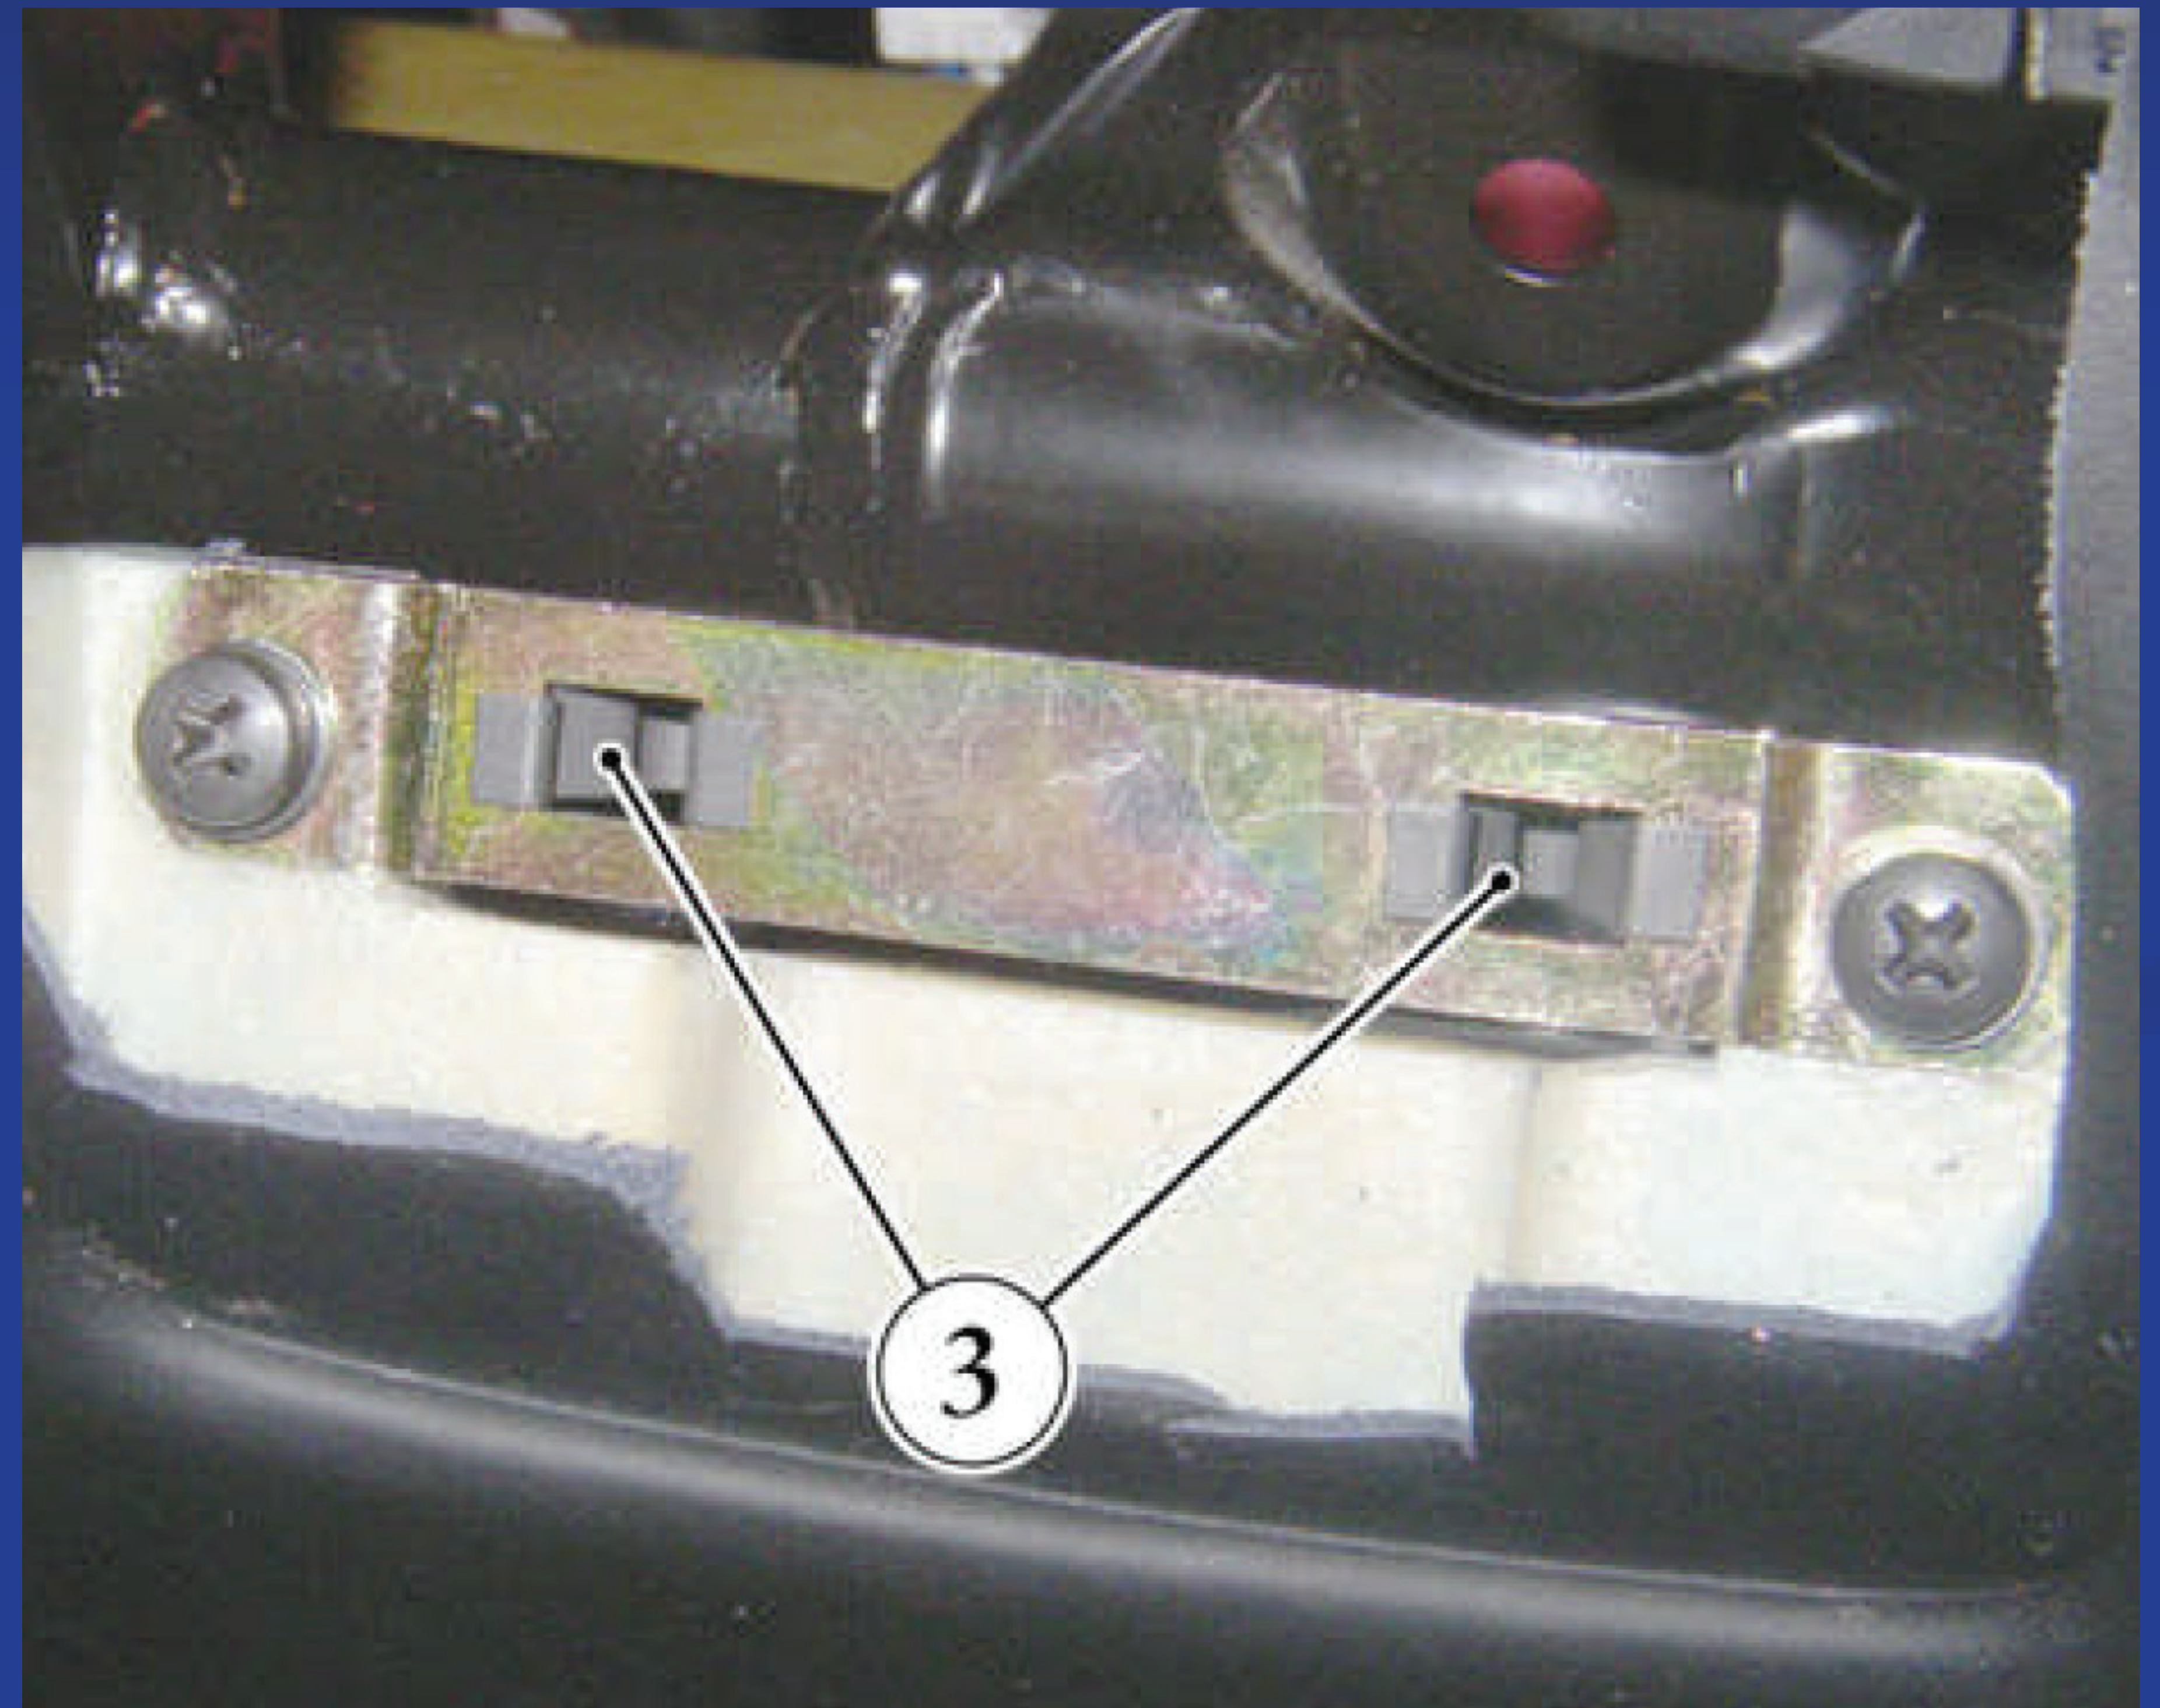

- Prise at the point indicated and gently press on the catches to remove the air vent from the trim.
- Undo the two upper trim retaining screws (1) for the trim.

- Remove all the switches from the driver-side trim and disconnect them from the dashboard cable.
- Undo the two lower retaining screws (2) of the driver-side trim and remove it from the dashboard together with the air vent.

- To remove the passenger-side trim, take out the adjustable air vent and, using the vent seat opening to get hold of the trim, detach it from the lower part of the dashboard.
- The passenger-side trim is fixed to the lower side of the dashboard by means of two pins that must be inserted in the dashboard clips (3).

Good luck, be patient and if you have any questions please do not hesitate to call or email us. Thanks
